

## Score reports keep getting *Smarter*.

The Smarter Balanced Reporting System is an interactive, online reporting platform that displays **clear information that helps teachers understand what their students know and can do.**

### Using the Reporting System, teachers can...

- **Focus in on their students.** Easily access student results based on customized classes and groups.
- **Access more useful information about how to help students.** Better determine which students need support and which have mastered the content.
- **Better understand what students know and can do.** View detailed item information—including rubrics and the content they measure—as well as students' responses to the items.

“These are the kind of enhancements to the Reporting System that we are certain our teachers are going to use to greatly improve the work that they are doing with their students on a daily basis.”

—Moses Jorge, Los Angeles Unified SD

### New features for Spring 2018:

- ✓ **Time-saving tools for teachers.** Teachers can save time by using the more than 100 Digital Library Connections Playlists, which link Interim Assessment Block results to resources in the Digital Library.
- ✓ **More detailed information about student responses.** Teachers can use the Key & Distractor Analysis feature to better analyze student responses on multiple-choice questions. For essay questions, teachers can use writing trait scores for more information about strengths and weaknesses in student writing.
- ✓ **Test scores follow students.** Teachers can now view results for their students who tested at another school.
- ✓ **Advanced reporting for District and School Leaders.** Create custom aggregate reports focused on selected attributes (e.g., subgroup performance on selected tests). Easily export all school- and district-level data with just a few clicks.

## Upcoming Features for Summer 2018

### Teacher-Created Groups

Teachers can create their own groups for their students

### Longitudinal Reports

Reports that track achievement of a cohort of students

### Expanded Custom Aggregate Reports

Available for Interim Assessment Blocks (IABs)

### New Roster Report for IABs

See all IAB results for one class

### New and Improved IAB Dashboard

See an overview of student results on one screen
