

Score reports just got *Smarter*.

The Smarter Balanced Reporting System is an interactive, online reporting platform that provides **clear, easy-to-understand data on student achievement**.

The system delivers intuitive and timely reports for teachers, parents, and administrators to **track student progress toward college and career readiness**.

Using the new Reporting System, administrators and educators can...

- ✓ **Focus in on students.** Easily access student results based on customized classes and groups.
- ✓ **Access more useful information about how to help students.** Better determine which students need support and which have mastered the assessed content.
- ✓ **Better understand what students know and can do.** View detailed item information—including rubrics and the content they measure—as well as students' responses to the items.
- ✓ **Connect to instructional resources.** Link to relevant Digital Library resources based on your students' performance.

Upcoming Features for 2018

Achievement Level Reports

Summative reports that compare state, district and school achievement levels by grade, school year and subgroups.

Achievement Standard Comparison

Summative reports that describe whether students met performance benchmarks for each grade and subject.

Longitudinal Data

Summative reports that provide information about student progress from year to year.

Expanded Digital Library Links

Even more instructional resources specific to each student test result.
